

Together we can make a difference. Put your passion into Clean Water Action!

Our Vision: Unite individuals for positive action by pooling their resources and deciding together where to direct **100 for Clean Water** funds next year.

Our Goal: Identify 100 or more individuals each year who will participate in **100 for Clean Water**.

Programs to choose from:

► **Clean Water** – Resist environmental policy and budget rollbacks. Fight for health and environmental protections from watershed to watertap — largely won over the past 40 years due to our grassroots action.

► **ReThink Disposable™** – Focus on eliminating the use of plastics, foam and “single-use disposables” (SUDs) at its greatest source — restaurants, food trucks, and institutions. This is an effective voluntary program proven to save small businesses thousands of dollars every year, as well as actively engage the public and businesses in the larger “Reuse Revolution”. The World Economic Forum predicts that there will be more plastics (by weight) in the ocean than fish by 2050.

► **Climate Change** – Secure state policies designed to achieve 100% green economy strategies by 2050. Create wide range of family-supporting jobs. Ensure climate justice in disproportionately impacted communities of color and low income. As a result, the Garden State will be more economically sustainable and ecologically resilient to future climate impacts.
