Twitter

Targets: EPA - @EPA; White House - @WhiteHouse

Sample tweets

- It's been 6 mos since 39,000lbs of toxic #CoalAsh spilled into the Dan River. Time for @EPA to help us #KickCoalAsh
- 27m gallons of #CoalAsh wastewater spilled into the Dan River. @EPA, @White – we're counting on you to help us #KickCoalAsh
- Hey - @EPA – 6 mos after the Dan River #CoalAsh spill, 1000's of sites are disasters waiting to happen. #KickCoalAsh
- Arsenic, lead, mercury...it's time to #KickCoalAsh. @EPA, @White – can we count on you for strong protections?
- A #CoalAsh disaster like the one at Dan River should never happen again. @EPA – help us #KickCoalAsh
- Simple: If we want to #ProtectCleanWater, we need @EPA to help us #KickCoalAsh
- Want this in your backyard? <http://www.nytimes.com/2008/12/25/us/25sludge.html> Then tell @EPA to #KickCoalAsh
- 140 million tons produced each year. And it's all toxic. @WhiteHouse – we need strong rules to #KickCoalAsh
- What could fill 426,780 Olympic sized pools each year? #coalash #KickCoalAsh
- 426,780 olympic sized pools of toxic #CoalAsh every year? @EPA – that's way too much. Time to #KickCoalAsh
- My household trash is more regulated than Duke's (insert your local coal-fired power company) #CoalAsh. @EPA – that's not right. Strong rules to #KickCoalAsh now!

Facebook

If possible tag the White House and EPA in your post.

Sample post

- It's been six months since 39,000 tons of toxic sludge and 27 million gallons of contaminated wastewater spewed into the Dan River from a Duke Energy coal ash pond. This coated the river bottom for 70 miles and threatened the drinking water for 8 downstream communities. And this wasn't an isolated incident. There are more than 1,000 disposal sites putting communities at risk across the country. It's time for EPA and the White House to help us #KickCoalAsh with the strongest possible rules.
